SQL Homework

Copy and paste your query and answers to each question.

1. Retrieve the names of all albums in alphabetical order
2. Find all tracks that are longer than 5 minutes.
3. Find all customers whose last name starts with 'M'.
4. Find all customers whose last name ends with 'n'.
5. Count the number of albums available in the database.
6. Find the total duration of all tracks in minutes
7. Find the total number of invoices per billing country
8. Find the average number of tracks per album
9. Find artists who have more than 3 albums.
10. Find the total number of purchases made per customer (including those who never bought anything)
11. Find the total sales revenue for each employee
12. Find albums that contain tracks longer than 10 minutes.
13. Find the most expensive invoice.
14. Find duplicate track names (tracks with the same name but different IDs)
15. Show all unique countries where customers are located
16. Count customers by country
